Open Innovation Program "MOIRe"

MOIRe
Mochida Open Innovation Research

At Mochida Pharmaceutical, we have implemented "MOIRe", our open innovation program for drug discovery based on proposals from academic researchers since 2019. We welcome applications from researchers with a great interest in connecting drug discovery seeds to pharmaceutical development.

Interest areas

- Intractable, Rare or Refractory diseases
- Drug development technologies

Applicant

Researchers and research representatives affiliated with public research institutions, universities, etc.
(also including researchers in university-originated venture companies.)

Application period

June 1 to July 31, 2023

Research proposals

- Collaborative research relating to drug candidates or targets for intractable, rare or refractory diseases focusing on therapeutic modalities of stem cell drugs, oligonucleotide therapeutics or gene therapy
- Collaborative research relating to technologies for stem cell drugs, oligonucleotide therapeutics or gene therapy

For more information, please visit our website.

Research period

One year in principle

Research expenses

Maximum **US$ 50,000** / project
(The amount is decided for each project after consultation.)

Selection

First selection: Reviews based on application documents
Second selection: Reviews by interview

Application method

Please download the application documents from the following website, fill in the required information and submit to the dedicated e-mail address.
