

Open Innovation Program “MOIRe”

MOIRe
Mochida Open Innovation Research

At Mochida Pharmaceutical, we have implemented “MOIRe”, our open innovation program for drug discovery based on proposals from academic researchers since 2019. We welcome applications from researchers with a great interest in connecting drug discovery technologies to pharmaceutical development.

Interest area

Technologies for
oligonucleotide
drug discovery

Application period

June 1 to July 31, 2024

Applicant

Researchers and research representatives affiliated with public research institutions, universities, etc.
(also including researchers in university-originated venture companies)

Research proposals

We invite your proposals for collaborative research on the following technologies.

- ◆ Technologies to obtain ligands for the specific tissue delivery of oligonucleotide therapeutics
- ◆ Quantification of oligonucleotide concentrations in biological samples
- ◆ Monitoring the tissue and subcellular distribution of oligonucleotide therapeutics
- ◆ Other drug discovery technologies related to oligonucleotide therapeutics
- ◆ Pulmonary inhalation devices for animal experiments

For more information, visit our website.

Research period

One year in principle

Research expenses

Maximum **US\$ 50,000** / project
(The amount is decided for each project after consultation.)

Selection

- First selection** Reviews based on application documents
Second selection Reviews by interview

Application method

Please download the application documents from the following website, fill in the required information and submit to the dedicated e-mail address.
